TEXAS Graduates

Graduate Voices – Impact of TheDream.US Scholarship

"TheDream.US gifted me my education. Like I said, I wouldn't be where I currently am without their help. I graduated college in four years, and I am currently working as a registered nurse. I know money doesn't mean everything, but this scholarship gave me the opportunity to focus on my education and work a part time job to help my mother out. It was truly and honor to be considered a scholar. I am currently working in a Labor and Delivery unit, paying my vehicle, and searching for my very own home! It is amazing how much my education has gifted me in such small time… My future children will no longer have to put "less than high school" in their paperwork and that itself speaks loudly. I'm truly grateful for this opportunity and I will help in any way this scholarship needs me to."

- University of Texas-Rio Grande Valley, Bachelor's in Nursing
  Registered Nurse

"It helped me graduate college debt-free! I'm grateful to have a community that supports me! As a future college advisor, I will make sure all my DACA students apply for this scholarship!"

- University of Houston, Bachelor's in Psychology
  Virtual Adviser at College Advising Corps

"If it were not for TheDream.US scholarship I do not think I would have graduated as soon as I did. I was going through hard times financially. I was working a low paying job as a waitress that I did not enjoy. With children it was hard to pay for school because I needed to care for them as well. I met some amazing scholarship recipients while at school and I felt connected through the mentor program. I was able to graduate, obtain my dream job of becoming an elementary school teacher, I now am a homeowner, and I am able to say I can pay my bills and support my family. None of this would have been possible without TheDream.US and the amazing people that support dedicated students like myself who are just here for a better life and to support the community."

- Texas A&M University, Bachelor's in Elementary Education
  Teacher at Harlandale Independent School District

"Thanks to TheDream.US I was able to go to college and drastically improve my life. I always had the goal of wanting to go to college, but it was up until my last year of high school that I realized it was a lot harder than I had thought based on the fact that I couldn't get much funding from anywhere and grew up in a lower income household. Because of TheDream.US I was able to receive an engineering degree and start working a professional job. I was able to come back home after graduating and thankfully be able to help my family financially during these hard moments.

University of Texas-El Paso, Bachelor's in Engineering
Information and Technology at Intuit"

"Both TheDream.US and my college degree have had significant financial and self-development impacts in my life. I feel like I have grown as both a person, but also as an intellectual. I have become an active member of my community in terms of higher education and have also contributed to my community through selective community services.

El Centro College, Associate in Dental Hygiene
Dental Hygienist at Mint Dentistry"

"I have started my own business.

- University of North Texas at Dallas, Bachelor's in Business Administration and Management
  Student Success Coach at Dallas College, graduate student, and business owner"
